WHY THE DIAGNOSIS MATTERS...

IF YOUR LOVED ONE’S EPILEPSY IS LGS, A PROPER DIAGNOSIS CAN HELP YOU:

- Find the answers you need and new sources of ongoing support
- Connect with a special community of families living with LGS and the knowledgeable professionals who care for them

“With a diagnosis of LGS, we were finally able to look at the signs and symptoms and it all clicked. Now we better understand why she’s having these problems.”

“Parents who have children with Lennox-Gastaut syndrome are a great source of strength for one another because they have that shared experience.”
